PROJECT MANAGEMENT IN THE DIGITAL HUMANITIES.

Course Syllabus

Instructor: Elena Fernández Fernández

Course content

- **Data Acquisition**
  - Webscrapping
  - PDF text Extraction
  - APIs (Introduction: Arxiv)
- **Cleaning and Pre-processing**
- **Data Analysis: Information Extraction**
- **Data Visualization**
  - Geospatial Analysis
  - Network Analysis

**Course content may vary depending on the development of the course*

DAY 1

13.00-13.50

- Introduction
- What is Digital Humanities?
- Steps to follow in a Digital Humanities Project
- Installing Jupyter Notebooks
- **Data Acquisition**: **Webscraping**
- Introduction to Webscrapping I: Project Guttenberg

14.00-14.50

- Introduction to Webscrapping II: HTML
- Webscrapping Wikipedia

15.00-16.00

- Advanced Webscraping: PDF Text Extraction. Webscrapping Spanish Government Website (BOE)

DAY 2

13.00-13.50

- **Data Acquisition:** PDF text extraction

14.00-14.50

- **Cleaning and Pre-Processing Data**

15.00-16.00

- Data Acquisition: APIs.
- Arvix. In between webscrapping and APIs.

DAY 3

13.00-13.50

- Information Extraction

- **NLTK**

14.00-14.50

- Exercise 1 NLTK

- **Spacy**

- Exercise 2

15.00-16.00

- **Final Activity: reviewing everything learnt so far.**

- Webscrapping Project Gutenberg >>>> Spacy NER extraction.

DAY 4

13:00-13:50

- **Geospatial Analysis**

- Exercise 1

14.00-14.50

- **Network Analysis**: Sociocentric Networks (weighted and unweighted).

15:00-16.00

- Exercise 1
- Exercise 2
